United States Patent and Trademark Office (USPTO) Office Action (Official Letter) About Applicant's Trademark Application

U.S. Application Serial No. 97120160

Mark: CULTURE SHOTS

Correspondence Address:
MADGE'S FOOD COMPANY
503 CHESTNUT ST
SAN ANTONIO TX 78202 UNITED STATES

Applicant: Madge's Food Company

Reference/Docket No. N/A

Correspondence Email Address: mike@madgesfood.com

NONFINAL OFFICE ACTION

The USPTO must receive applicant's response to this letter within six months of the issue date below or the application will be abandoned. Respond using the Trademark Electronic Application System (TEAS). A link to the appropriate TEAS response form appears at the end of this Office action.

Issue date: August 25, 2022

Introduction

The referenced application has been reviewed by the assigned trademark examining attorney. Applicant must respond timely and completely to the issue(s) below. 15 U.S.C. §1062(b); 37 C.F.R. §§2.62(a), 2.65(a); TMEP §§711, 718.03.

Summary of Issues

- Advisory regarding Potential Section 2(d) Refusal - Prior-Filed Applications
- Section 2(e)(1) – Merely Descriptive Refusal
- Advisory regarding Amendment to Claim Acquired Distinctiveness under Section 2(f) or Amendment to the Supplemental Register to Overcome Refusal
- Advisory regarding Disclaimer of Generic Wording if Amending to Claim Acquired Distinctiveness under Section 2(f) or to the Supplemental Register
- Advisory Regarding Hiring a Trademark Attorney

Advisory regarding Potential Section 2(d) Refusal - Prior-Filed Applications

The trademark examining attorney has searched the USPTO database of registered and pending marks and has found no conflicting registered marks that would bar registration under Trademark Act Section 2(d). 15 U.S.C. §1052(d); TMEP §704.02. However, marks in prior-filed pending applications may present a bar to registration of applicant's mark.

The filing dates of pending U.S. Application Serial Nos. 88952216 and 79325369 precede applicant's filing date. See attached referenced applications. If one or more of the marks in the referenced applications register, applicant's mark may be refused registration under Trademark Act Section 2(d) because of a likelihood of confusion with the registered mark(s). *See* 15 U.S.C. §1052(d); 37 C.F.R. §2.83; TMEP §§1208 *et seq.* Therefore, upon receipt of applicant's response to this Office action, action on this application may be suspended pending final disposition of the earlier-filed referenced applications.

In response to this Office action, applicant may present arguments in support of registration by addressing the issue of the potential conflict between applicant's mark and the marks in the referenced applications. Applicant's election not to submit arguments at this time in no way limits applicant's right to address this issue later if a refusal under Section 2(d) issues.

While applicant is not required to respond to the issue of the pending application, applicant must respond to the refusal(s) and requirement(s) below within the six month deadline mentioned above to avoid abandonment.

Section 2(e)(1) – Merely Descriptive Refusal

Registration is refused because the applied-for mark merely describes an ingredient or quality of applicant's goods and/or services. Trademark Act Section 2(e)(1), 15 U.S.C. §1052(e)(1); *see* TMEP §§1209.01(b), 1209.03 *et seq.*

A mark is merely descriptive if it describes an ingredient, quality, characteristic, function, feature, purpose, or use of an applicant's goods and/or services. TMEP §1209.01(b); *see, e.g., In re TriVita, Inc.*, 783 F.3d 872, 874, 114 USPQ2d 1574, 1575 (Fed. Cir. 2015) (quoting *In re Oppedahl & Larson LLP*, 373 F.3d 1171, 1173, 71 USPQ2d 1370, 1371 (Fed. Cir. 2004)); *In re Steelbuilding.com*, 415 F.3d 1293, 1297, 75 USPQ2d 1420, 1421 (Fed. Cir. 2005) (citing *Estate of P.D. Beckwith, Inc. v. Comm'r of Patents*, 252 U.S. 538, 543 (1920)).

Here, applicant has applied to register the mark CULTURE SHOTS for use in connection with "Vegetable-based food beverages" in Class 29.

The attached evidence from *Collins Dictionary* shows that the wording CULTURE means "the growth of bacteria, microorganisms, or other plant and animal cells in a specially prepared nourishing fluid or solid". The attached evidence from *Merriam-Webster* shows that the wording SHOT means "a small measure or serving (such as one ounce) of undiluted liquor or other beverage." Taken together, the combination of the wording CULTURE and SHOTS immediately conveys that applicant's goods are small measures or services of beverages that contain bacteria, microorganisms, or other plant and animal cells that were grown in a specially prepared nourishing fluid or solid (e.g., shots of beverages that are cultured or are prepared using cultures).

Moreover, the attached evidence from applicant's website shows that applicant describes the goods as "Probiotics and electrolytes all in one shot. This is a multi-shot 12 oz. bottle. Drink a shot daily to build a stronger gut microbiome," which shows that the wording SHOT is merely descriptive of applicant's goods. Additionally, the label of the goods shows that these beverages contain probiotics.

The attached evidence from *Farmhouse Culture* shows that the "term 'probiotics' is often used instead of the word 'live cultures or good and friendly bacteria'." Further, the attached evidence from *Farmhouse Culture, Pressed, and So Good So You* shows that the wording probiotic shots is used to describe vegetable-based food beverages that contain cultured probiotics.

Generally, if the individual components of a mark retain their descriptive meaning in relation to the goods and/or services, the combination results in a composite mark that is itself descriptive and not registrable. *In re Fat Boys Water Sports LLC*, 118 USPQ2d 1511, 1516 (TTAB 2016) (citing *In re Tower Tech, Inc.*, 64 USPQ2d 1314, 1317-18 (TTAB 2002)); TMEP §1209.03(d); *see, e.g., DuoProSS Meditech Corp. v. Inviro Med. Devices, Ltd.*, 695 F.3d 1247, 1255, 103 USPQ2d 1753, 1758 (Fed. Cir. 2012) (holding SNAP SIMPLY SAFER merely descriptive for various medical devices, such as hypodermic, aspiration, and injection needles and syringes); *In re Fallon*, 2020 USPQ2d 11249, at *12 (TTAB 2020) (holding THERMAL MATRIX merely descriptive of a heat-responsive, malleable liner that is an integral component of an oral dental appliance).

Only where the combination of descriptive terms creates a unitary mark with a unique, incongruous, or otherwise nondescriptive meaning in relation to the goods and/or services is the combined mark registrable. *See In re Omniome, Inc.*, 2020 USPQ2d 3222, at *4 (TTAB 2019) (citing *In re Colonial Stores, Inc.*, 394 F.2d 549, 551, 157 USPQ 382, 384 (C.C.P.A. 1968); *In re Shutts*, 217 USPQ 363, 364-65 (TTAB 1983)); *In re Positec Grp. Ltd.*, 108 USPQ2d 1161, 1162-63 (TTAB 2013).

In this case, both the individual components and the composite result are descriptive of applicant's goods and/or services and do not create a unique, incongruous, or nondescriptive meaning in relation to the goods and/or services. Specifically, the combination of CULTURE and SHOTS does not create a new or non-descriptive meaning. Rather, when consumers encounter the mark CULTURE SHOTS they will immediately understand that applicant's goods are small servings of beverages (e.g., shots) that contain cultured probiotics.

Ultimately, when purchasers encounter applicant's goods using the mark CULTURE SHOTS, they will immediately understand the mark as indicating an ingredient or quality of the goods, and not an indication that applicant is the source of the goods. Therefore, the mark is merely descriptive, and registration is refused pursuant to Section 2(e)(1) of the Trademark Act.

Advisory regarding Amendment to Claim Acquired Distinctiveness under Section 2(f) or Amendment to the Supplemental Register to Overcome Refusal

The applied-for mark has been refused registration on the Principal Register. Applicant may respond by submitting evidence and arguments against the refusal. In addition, applicant may respond by doing one of the following: (1) amending the application to seek registration under Trademark Act Section 2(f), or (2) amending the application to seek registration on the Supplemental Register. *See 15 U.S.C. §§1052(f), 1091.*

To seek registration on the Principal Register based on a claim of acquired distinctiveness under Section 2(f), applicant generally may (1) submit actual evidence that the mark has acquired distinctiveness of the goods and/or services, (2) claim ownership of an active prior U.S. registration for the same mark for sufficiently similar goods and/or services, or (3) provide the following verified statement of five years' use: "**The mark has become distinctive of the goods and/or services through the applicant's substantially exclusive and continuous use of the mark in commerce that the U.S. Congress may lawfully regulate for at least five years immediately before the date of this statement.**" *See 15 U.S.C. §1052(f); 37 C.F.R. §2.41(a); TMEP §§1212.03-.06 et seq.*

To amend the application to the Supplemental Register, applicant must provide a written statement requesting that the application be amended to the Supplemental Register. TMEP §816.01; *see 15 U.S.C. §1091; 37 C.F.R. §2.47.*

Although registration on the Supplemental Register does not afford all the benefits of registration on the Principal Register, it does provide the following advantages to the registrant:

- (1) Use of the registration symbol ® with the registered mark in connection with the designated goods and/or services, which provides public notice of the registration and potentially deters third parties from using confusingly similar marks.
- (2) Inclusion of the registered mark in the USPTO's database of registered and pending marks, which will (a) make it easier for third parties to find it in trademark search reports, (b) provide public notice of the registration, and thus (c) potentially deter third parties from using confusingly similar marks.
- (3) Use of the registration by a USPTO trademark examining attorney as a bar to registering confusingly similar marks in applications filed by third parties.

(4) Use of the registration as a basis to bring suit for trademark infringement in federal court, which, although more costly than state court, means judges with more trademark experience, often faster adjudications, and the opportunity to seek an injunction, actual damages, and attorneys' fees and costs.

(5) Use of the registration as a filing basis for a trademark application for registration in certain foreign countries, in accordance with international treaties.

*See 15 U.S.C. §§1052(d), 1091, 1094; J. Thomas McCarthy, *McCarthy on Trademarks & Unfair Competition* §§19:33, 19:37 (rev. 4th ed. Supp. 2017).*

NOTE: Amending to the Supplemental Register will ***not*** resolve the potential Section 2(d) Refusal(s).

Advisory regarding Disclaimer of Generic Wording if Amending to Claim Acquired Distinctiveness under Section 2(f) or to the Supplemental Register

Applicant is advised that, if the application is amended to seek registration on the Principal Register under Trademark Act Section 2(f) or on the Supplemental Register, applicant will be required to disclaim "SHOTS" because such wording appears to be generic in the context of applicant's goods and/or services. *See 15 U.S.C. §1056(a); In re Wella Corp.*, 565 F.2d 143, 144, 196 USPQ 7, 8 (C.C.P.A. 1977); *In re Creative Goldsmiths of Wash., Inc.*, 229 USPQ 766, 768 (TTAB 1986); TMEP §1213.03(b).

Applicant may submit a disclaimer in the following format:

No claim is made to the exclusive right to use "SHOTS" apart from the mark as shown.

TMEP §1213.08(a)(i).

For an overview of disclaimers and instructions on how to provide one using the Trademark Electronic Application System (TEAS), see the [Disclaimer webpage](#).

Response Options to Refusals

Although applicant's mark has been refused registration, applicant may respond to the refusal(s) by submitting evidence and arguments in support of registration.

Response guidelines. For this application to proceed, applicant must explicitly address each refusal and/or requirement in this Office action. For a refusal, applicant may provide written arguments and evidence against the refusal, and may have other response options if specified above. For a requirement, applicant should set forth the changes or statements. Please see "[Responding to Office Actions](#)" and the informational [video "Response to Office Action"](#) for more information and tips on responding.

Please call or email the assigned trademark examining attorney with questions about this Office action. Although an examining attorney cannot provide legal advice, the examining attorney can provide additional explanation about the refusal(s) and/or requirement(s) in this Office action. *See* TMEP

§§705.02, 709.06.

The USPTO does not accept emails as responses to Office actions; however, emails can be used for informal communications and are included in the application record. *See* 37 C.F.R. §§2.62(c), 2.191; TMEP §§304.01-.02, 709.04-.05.

Advisory Regarding Hiring a Trademark Attorney

Because of the legal technicalities and strict deadlines of the trademark application process, applicant is encouraged to hire a private attorney who specializes in trademark matters to assist in this process. The assigned trademark examining attorney can provide only limited assistance explaining the content of an Office action and the application process. USPTO staff cannot provide legal advice or statements about an applicant's legal rights. TMEP §§705.02, 709.06. See [Hiring a U.S.-licensed trademark attorney](#) for more information.

Probiotic Shot

What's in this juice? It's a blend of apple, red cabbage, lemon, ginger and probiotic. A tasty & easy-to-drink combination of probiotics & red cabbage with sweet apple & a light kick of ginger. Note: This bottle is made from 100% rPET, an eco-friendly, completely recyclable plastic that has a slightly yellow tint.

What are probiotics?

MAY 01, 2020

UNDERSTANDING PROBIOTICS

Probiotics, also known as live cultures, good bacteria, or friendly flora, are bacteria that contribute positively to our health. Probiotics line your digestive tract and support your body's ability to absorb nutrients and fight infection.

HOW PROBIOTICS WORK

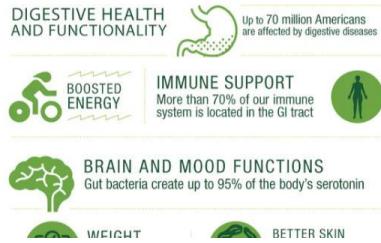

Probiotics are naturally found in our bodies, among the trillions of bacteria that make up our "microbiome" (the name for the community of bacteria that live on and around us). Stress, poor diet, antibiotics and disease can throw our microbiome out of balance, creating the need to supplement our body's existing bacteria with probiotics. When you consume probiotics, they travel to your gut via your digestive system, where they not only help break down food and assist with the digestive process, but also fight off harmful bacteria and provide a host of other benefits.

FOODS WITH PROBIOTICS

Sauerkraut, Kimchi, Fermented Vegetables (such as radish, carrots & onions), Kefir, Kombucha, Yogurt, Miso, Tempeh

PROBIOTICS

ARE LINKED TO A HOST OF
HEALTH BENEFITS, INCLUDING:

WEIGHT LOSS

REDUCED INFLAMMATION

AND DENTAL HEALTH

NUTRIENT ABSORPTION

Probiotics help to convert nitrates into energy, can improve absorption of vitamins and nutrients, and even aid in protein utilization.

A study of male endurance athletes showed probiotics helped reduce inflammation.

Fermented veggie drink. USDA Organic. Certified Organic by CCOF. Organic is Non-GMO & more. Gluten free. Vegan. No added sugars. Naturally probiotic from organic veggies. Always organic. 10+ shots per bottle. Always Organic: At Farmhouse Culture, we craft products that excite the palate and nourish the body by unlocking the power of organic and fermented foods. We've created a gut-healthy brew your body will crave. Through wild fermenting organic cabbage with sea salt and savory spices, each tangy shot is full of multiple strains of live probiotic cultures. Incorporate these shots into your daily routine and bask in your new digestive glow! 1 Shot = 1.5 fl oz. Due to the nature of wild fermentation, the probiotic quantity and type present in each bottle varies batch-to-batch. Unpasteurized. farmhouseculture.com.

Probiotics (Live cultures)

When it comes to probiotics, it is not a question of 'one-size-fits-all'. At Optibac Probiotics, we specialize entirely in probiotics and use different strains for different groups of people and for different reasons. With our range of specialized probiotic supplements, we aim to offer each of our customers a specific supplement to suit their individual needs.

Definition

The term 'probiotics' is often used instead of the word 'live cultures or good and friendly bacteria'. Examples of probiotics include microorganisms such as *Lactobacillus acidophilus* or *Bifidobacterium infantis*.

What is a strain?

A strain is just a specific type of bacteria, in the same way that a Golden Retriever is a specific type of dog. Different manufacturers use different strains. Although these may be of the same species and genera; meaning that **one acidophilus supplement is not equal to another acidophilus supplement**. It is therefore best to choose a probiotic supplement that uses robust, well-researched strains.

The naming of bacteria can take some getting used to, so we've tried to explain it here as simply as possible, as it is so important! The strain name can tell you all about the research and mode of action behind the friendly bacteria. The name *Lactobacillus acidophilus* Rosell-52 tells you the name of the genus (*Lactobacillus*), the species (*acidophilus*) and the strain (Rosell-52) of the live cultures.

Many of our strain names include 'Rosell' as they originated from, and have been rigorously tested by Institut Rosell, one of the leading laboratories in the field. For further clarification, please see the relevant terms in our glossary: genus, species and strain or take a look at the 'The Strain Myth', both of which can be found in the Probiotics

Which live culture strains are best?

As well as selecting the optimum probiotics, it is important to consider the viability and efficacy of the strains themselves. Generally, the best strains tend to be the most well-researched, so look out for those with plenty of clinical trials investigating them.

The strains must be alive at the time of consumption and must survive the stomach acidity in order to reach the intestines. Optibac Probiotics strains undergo numerous in-vitro tests documenting their viability at room temperature and their ability to survive the acidic stomach environment and bile salts.

Friendly bacteria are all individual, and different strains have different modes of action in the body. Therefore, the best live cultures for you might not be the best for somebody else. In general, however, there are a few good ways to tell if a strain is high quality:

- It should be guaranteed to reach the gut alive
- It should be well-researched
- It should have been featured in gold standard human clinical trials and not just in-vitro tests

Are probiotics the same thing as dairy or yogurt?

Not quite. Yogurts will always contain live bacteria (to different extents, according to various factors including pasteurisation, whether or not good bacteria have been added for nutritional value, and so on), and interestingly, it is the live bacterial cultures which help to convert milk into yogurt in the first place. However, probiotics can also be found in other foods such as sauerkraut, and they may be extracted from dairy and cultivated and multiplied to make a probiotic supplement.

Are probiotics always bacterial?

They are often bacterial, but not always. It is also possible to have active cultures of beneficial yeasts, for example *Saccharomyces boulardii*.

Optibac Probiotics strains

At Optibac Probiotics, we specialise entirely in probiotics and all of our products contain various types of active cultures. We use different strains for different groups of people and for different reasons. We aim to offer each of our customers a specific supplement to suit their individual needs. When it comes to live cultures, it is not a question of 'one-size-fits-all'! Our range has something for everyone - find which one is right for you.

Bacillus coagulans Unique IS-2

Scientifically researched and shown to survive and reach the guts of children alive. Find this strain in Kids Gummies and Adult Gummies.

Bifidobacterium bifidum Rosell-71

Well-researched and proven to survive to reach the gut alive and support gut health. Find this strain in Every Day and One Week Flat.

Bifidobacterium breve M-16V[®]

Clinically trialled and proven to be safe from birth, and to support immune and digestive health. Find this strain in Baby Drops and Babies & Children.

Bifidobacterium breve Rosell-70

Well-researched and proven to survive to reach the gut alive and support digestive health. Find this strain in Every Day.

© Optibac Probiotics Ltd 2018

Bifidobacterium lactis BB-12®

Thought to be the world's most well-researched strain of the entire Bifidobacteria genus, this strain helps to support digestive health and regularity. Find this strain in Bifido & Fibre.

Bifidobacterium lactis BI-04®

Extensively researched for gut and immune health, and often trialled with *B. lactis* BI-07® and *L. acidophilus* NCFM®. Find this strain in Every Day EXTRA and Every Day MAX.

Bifidobacterium lactis BI-07®

Clinically researched for digestive and immune support, and proven to survive and reach the gut alive, alone or in combination. Find this strain in Every Day EXTRA.

Bifidobacterium lactis HN019

From the incredibly well-researched Bifidobacterium genus, HN019 was originally isolated from a yoghurt source. Find this strain in Every Day MAX and Pregnancy.

Bifidobacterium longum Rosell-175

Well-researched for gut health, and proven to survive to reach the gut alive and adhere to the gut lining. Find this strain in Every Day and For travelling abroad.

Lactobacillus acidophilus La-14®

Well-researched in pregnant women and shown to reach the vagina alive, and support intimate health. Often trialled alongside *Lactobacillus rhamnosus* HN001. Find both of these strains in Pregnancy.

Lactobacillus acidophilus NCFM®

The most well-researched strain of *L. acidophilus* in the world, which helps with digestive discomfort and overall health. Find this strain in Every Day EXTRA and Every Day MAX.

Lactobacillus acidophilus Rosell-52

Often trialled with *L. rhamnosus* Rosell-11, this strain is well-researched and proven to reach the gut alive even during antibiotics. Find this strain in Every Day, For travelling abroad and One Week Flat.

Lactobacillus casei Rosell-215

Well-researched and proven to survive to reach the gut alive and support digestive health. Find this strain in One Week Flat.

Lactobacillus paracasei CASEI 431®

One of the most well-researched strains of Lactobacillus for immune health; described in over 80 scientific publications, and tested on thousands of people in over 20 clinical trials. Find this strain in Immune Support.

Lactobacillus paracasei Lpc-37®

Well-researched and proven to survive to reach the gut alive and adhere to the gut lining. Find this strain in Every Day EXTRA.

Lactobacillus paracasei F-19®

Clinically trialled to support intimate health. Find this strain in For Women.

Lactobacillus plantarum CECT 7527, *L. plantarum* CECT 7528 and *L. plantarum* CECT 7529

Usually researched as a trio and used alongside Omega-3 for maintaining healthy cholesterol. Find this strain in For Cholesterol.

Lactobacillus reuteri RC-14® and *Lactobacillus rhamnosus* GR-1®

Extensively researched for supporting vaginal health; mostly trialled as a pair, in 26 trials and in over 2,500 women. Find this strain in For Women.

Lactobacillus rhamnosus HN001

Highly researched in pregnant women, and shown to safely reach the gut and vagina alive. Often trialled alongside *Lactobacillus acidophilus* La-14*, it helps to support vaginal health. Find this strain in Pregnancy and Babies & Children.

Lactobacillus rhamnosus Rosell-11

This strain has been trialled with *L. acidophilus* Rosell-52 alongside antibiotics. Find this strain in Every Day and For travelling abroad.

Lactobacillus rhamnosus GG

The most scientifically studied strain in the world. Find this strain in Babies & Children.

Lactococcus lactis Rosell-1058

Well-researched and proven to survive to reach the gut alive and provide digestive health support. Find this strain in Every Day and One Week Flat.

Saccharomyces boulardii

Actually a transient yeast, *S. boulardii* boasts international acclaim for the support of occasional diarrhoea, and was introduced to the UK and Ireland by Optibac. This strain is found in For travelling abroad and *Saccharomyces Boulardii*.

In conclusion, it is very important to look at friendly bacteria on a strain-specific level, rather than only the genus and species of the microorganism in question.

Where do probiotics come from?

Every friendly bacteria strain is unique, and this is also true of their origins. *Saccharomyces boulardii*, for example, is actually a yeast, and was originally derived from the lychee fruit. *Bifidobacterium lactis* HN019, on the other hand, was first extracted from a yogurt source. Many strains of friendly bacteria are known as 'human strains'; this means they were initially isolated from healthy digestive tracts of humans and are natural residents of the gut! This doesn't, however, mean they are extracted from humans for commercial use or that probiotics you may take are directly taken from that source. In fact, the original strains are stored in microbiology 'banks' and future generations are cultured by scientists in laboratories.

To find out more about the Optibac range, visit our live cultures shop or take a look at our 'Why Optibac?' article.

The definitions mostly stress on the projectile, but it never made allusion to a blank being fired. want to know if that would be a considered a shot as well.

© 2022 Merriam-Webster, Incorporated

United States Patent and Trademark Office (USPTO)

USPTO OFFICIAL NOTICE

Office Action (Official Letter) has issued

on August 25, 2022 for

U.S. Trademark Application Serial No. 97120160

A USPTO examining attorney has reviewed your trademark application and issued an Office action. You must respond to this Office action in order to avoid your application abandoning. Follow the steps below.

(1) [**Read the Office action**](#). This email is NOT the Office action.

(2) **Respond to the Office action by the deadline** using the Trademark Electronic Application System (TEAS). Your response must be received by the USPTO on or before 11:59 p.m. **Eastern Time** of the last day of the response period. Otherwise, your application will be [abandoned](#). See the Office action itself regarding how to respond.

(3) **Direct general questions** about using USPTO electronic forms, the USPTO [website](#), the application process, the status of your application, and whether there are outstanding deadlines to the [Trademark Assistance Center \(TAC\)](#).

After reading the Office action, address any question(s) regarding the specific content to the USPTO examining attorney identified in the Office action.

GENERAL GUIDANCE

- [**Check the status**](#) of your application periodically in the [Trademark Status & Document Retrieval \(TSDR\)](#) database to avoid missing critical deadlines.
- [**Update your correspondence email address**](#) to ensure you receive important USPTO notices about your application.
- [**Beware of trademark-related scams**](#). Protect yourself from people and companies that may try to take financial advantage of you. Private companies may call you and pretend to be the USPTO or may send you communications that resemble official USPTO documents to trick you. We will never request your credit card number or social security number over the phone. And all official USPTO correspondence will only be emailed from the domain “@uspto.gov.” Verify the correspondence originated from us by using your Serial Number in our database, [TSDR](#), to confirm that it appears under the “Documents” tab, or contact the [Trademark Assistance Center](#).

- **Hiring a U.S.-licensed attorney.** If you do not have an attorney and are not required to have one under the trademark rules, we encourage you to hire a U.S.-licensed attorney specializing in trademark law to help guide you through the registration process. The USPTO examining attorney is not your attorney and cannot give you legal advice, but rather works for and represents the USPTO in trademark matters.
